## MAINTENANCE

86372290

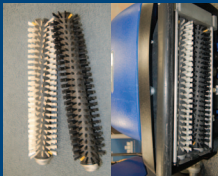

01) Drain and rinse recovery tank.

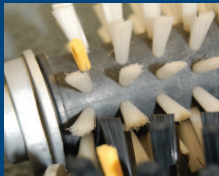

02) Drain solution tank.

03) Clean off the float shut off.

04) Clean brushes and vacuum shoe.

05) **INSPECT BRUSHES:** When the brush bristles reach the height of the yellow indicator bristles replace the brushes.

06) Store brushes in the recovery tank bearing side up and vent the recovery tank dome for storage.

07) Soak spray jets in a solution of water and vinegar overnight.

## OPERATION

86372290

01) Install jets and brush.

02) Fill solution tank with extraction rinse or fresh water.

03) Make sure that all three prongs are on the main body of the cord. If one of the prongs is missing, notify your supervisor. Plug into outlet and machine cord and twist to lock.

04) FOR SPOTTING: plug tool into the recovery tank and switch the control button to upholstery tool.

05) Adjust handle for push or pull cleaning and operator height.

06) Choose whether the water flows through the white jet (mode A) for encapsulation cleaning or the blue jet (mode B) for deep extraction and rinsing.

07) Choose continuous or intermittent spray. Press buttons on handle to control spray on intermittent mode.
