VOYAGER DUO AND COMMODORE DUO

MAINTENANCE

86372350

01) Drain and rinse recovery tank.

02) Clean float shut off.

03) Remove squeegee and inspect blades. If the squeegee is damaged, flip the blade or replace.

04) Clean squeegee.

05) Clean brushes.

06) **INSPECT BRUSHES:** When the black brush bristles reach the height of the yellow indicator bristles replace the brush.

07) Remove jets and soak in a solution of hot water and vinegar overnight.
