WINDSOR DOMINATOR WITH HEAT

OPERATION

86372340

01) Fill the solution tank with extraction rinse or fresh water.

02) Plug the cord for heat (right side) and cord for normal operations (left side) into two separate circuit breakers.

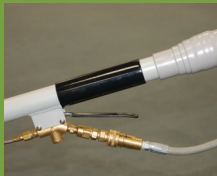

03) Connect the vacuum hose and the solution hose to the machine and the accessory.

04) Turn on the pump, vacuum and heat.

05) Adjust the PSI appropriately. COUNTERCLOCKWISE decreases PSI and CLOCKWISE increases PSI.

06) Let go of the trigger on the wand two inches before the end of your pass.

07) Unplug both of the cords from the circuit breakers.

WINDSOR DOMINATOR WITH HEAT

OPERATION

86372340

08) Be careful not to pull down too hard on the strain reliefs so that the strain reliefs will not be damaged when the cords are wrapped.

09) Wrap the cords for storage starting from the base. Wrapping the cords properly will help prevent cord failure.
