

WINDSOR TAZ WITH ORB TECHNOLOGY

MAINTENANCE

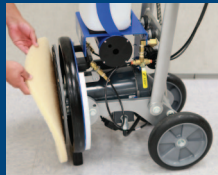

86376050

01) Flush the system. Put $\frac{1}{2}$ gallon of clean water into the solution tank and press the solution switch, running until the water is completely out.

02) Wipe down the exterior of the machine with a clean rag.

03) Take the pad off.

04) Periodically tighten the screws on the bottom of the driver head with a Phillips #3.

Black Knobs

05) Store in upright position with the driver head up and the handle folded down. To fold down the handle, loosen the black knobs.

06) Periodically soak the jets in a vinegar solution.
