Pad Pressure (%) vs. Time

The PE300BU keeps 88% of its original pad pressure after 3 hours of burnishing.

STEADYOne™

TECHNOLOGY

SteadyOne™ uses advanced fluid drive technology to maintain constant pad pressure and produce more consistent results. Unlike other machines using spring mechanisms that vary when a metal coil compresses or extends, SteadyOne™ automatically adjusts the deck as the pad wears to apply the same pad pressure throughout the burnishing operation. Floor care professionals can now get the same **one-pass** results today ... and tomorrow.

X₂™ concentrates burnish energy in a much smaller area than a single conventional round pad. This allows the machine to do more work while consuming less energy. A larger area can be burnished with our 3-battery, 30" machine vs. the competition's 6-battery, 27" machine on a single charge.
