

## Dust Control Series

300125 | 24" Dust Control XP  
 300126 | 27" Dust Control XP  
 300110 | 27" Dust Control AP

300119 | 27" Dust Control XP with Robin  
 300110 | 27" Dust Control AP with Robin

STONEKOR's Eagle Brand Dust Control Series buffers offer versatility for both janitorial and concrete grinding applications. The Dust Control Series offers two solutions to actively control and collect dust in high dust environments.

The **Dust Control XP** (*top right*), ideal for use across concrete and other environments, actively captures 85% of dust particles inside the dust shroud and skirt into a reusable dust filter bag, and this unit also comes equipped with a 2" port to attach an external vacuum system for heavier dust environments. The Dust Control Series XP buffers are available in 24" and 27" sizes and are constructed with a very durable aluminum cast deck and high quality components for long lasting performance and easy maintenance.

The **Dust Control AP** (*bottom right*) utilizes an active dust vacuum system to capture 95% of dust particles in a disposable vacuum bag and contains no external vacuum port. The Dust Control AP is available in 27" only.

### FEATURES

- Active dust collection system
- Heavy duty construction
- Vacuum bag & external vacuum port (XP model only)
- Steel tank
- STONEKOR ProCarb™ carburetor & E-Zero™ emissions shutdown
- Engine kill switch
- Exceeds EPA & CARB standards

### TECH SPECS

- Production: 28,000 ft<sup>2</sup> / 2,600 m<sup>2</sup>
- Shipping Weight: 330 pounds / 136 kg
- Engine Speed: 3,600 rpm maximum
- Pad Speed: 1,800 rpm
- Pad Size: 24 inches / 0.6 m (2 engine options)  
 27 inches / 0.7 m (2 engine options)

“ Stonekor's Dust Control Series is ideal for keeping a clean work area by actively capturing up to 95% of dust particles. ”
