

1510/1530

Battery & Cord-Electric Automatic Extractors

Extremely easy to use controls allow the operator to start cleaning with the touch of only one button.

The extractor head and vacuum shoe automatically lowers at the start of operation and raises when machine goes in reverse. It easily clears the threshold during transportation.

The new 1510/1530 extractor is new, sleek and extremely easy to use. By pressing **one button** and twisting the handle grips, everything happens automatically. Just choose the cleaning mode, twist the handle grips and start cleaning. Both deep and surface cleaning modes are available, and remote tools can be attached to clean tight areas. The 1510, 24-volt battery model features the productivity of "cord free" operation and dual vacuum motor for great recovery. The 1530, cord-electric model, holds an impressive 30 gallons of solution to keep trips to the fill/dump site to a minimum. These machines are perfect for cleaning medium to large areas of carpet like hallways and meeting rooms. Both front and rear solution fill ports allow the machine to back or drive forward to the fill station. The recovery tank cover assures a great seal and is easily removable. The brush deck raises for easy transport and access to the brush. The 1510/1530 is constructed to high Tennant durability standards for years of worry-free operation.

**Model 1530 currently not available in Canada.*
