| Notes | 22 |

In this manual you will find the essentials you need to know when repairing the wet and dry vacuum cleaners in the MAXXI II series. When carrying out repairs, make sure you have a suitable workbench or the like with the necessary water and power supply available.

 If you determine an error in operation, be sure to refer the customer to the user manual.

A fault in the equipment can have a number of causes. The chapter "service / repair" will help you here. Use the illustrated spare parts lists for your repairs. These show you the location of the individual parts and the sequence in which they are assembled.

 Always refer to the technical service bulletin information sheets. Also known as TSB's

These will tell you about any technical modifications made after publication of this service manual.

Only use original Nilfisk-ALTO spare parts

It is under no circumstances legal to provide this service manual and any technical service bulletin that might be released to third party without a written approval from the Global Product Management group, located at

Sognevej 25, 2605 Brøndby, Denmark

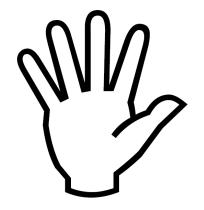

To be performed by a skilled or instructed person only!

Disconnect the vacuum cleaner from the power supply before starting the work!

Safety instructions marked with this symbol in this manual must be observed to prevent danger to persons.

This symbol is used to mark safety instructions that must be observed to prevent damage to the equipment and degradation of performance.

This symbol indicates tips and instructions to simplify work and to ensure safe operation.

Technical specification for the MAXXI II JP variants

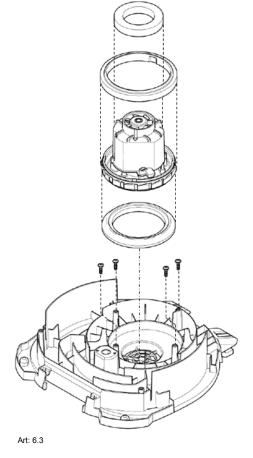

MAXXI II - Top 35

Art: 6.1 shows how the handle, top cover and the switch is placed on top of the motor cover.

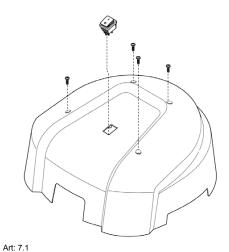

Art: 6.2 shows how the motor cover is fitted into the bottom part of the motor head.

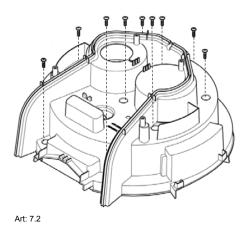

Art: 6.3 shows how the motor is fitted into the bottom part of the motor head.

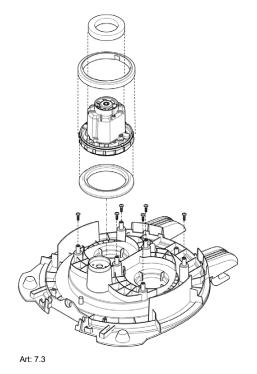

MAXXI II - Top 55-1, 75-1

Art: 7.1 shows how the top cover and the switch is placed on top of the motor cover.

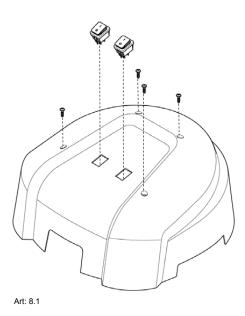

Art: 7.2 shows how the motor cover is fitted into the bottom part of the motor head.

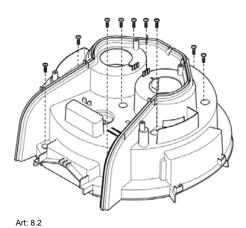

Art: 7.3 shows how the motor is fitted into the bottom part of the motor head.

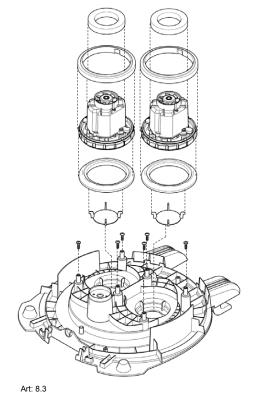

MAXXI II - Top 55-2, 75-2

Art: 8.1 shows how the top cover and the switches are placed on top of the motor cover.

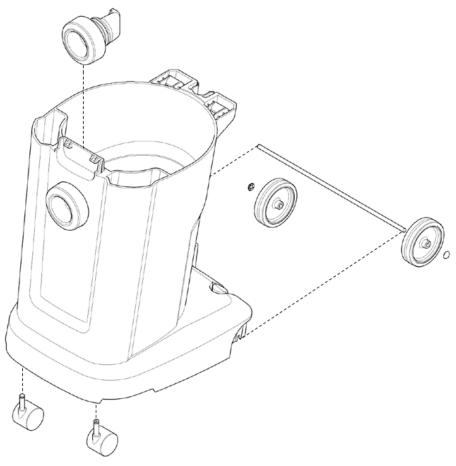

Art: 8.2 shows how the motor cover is fitted into the bottom part of the motor head.

Art: 8.3 shows how the motors are fitted into the bottom part of the motor head.

MAXXI II - Container 35

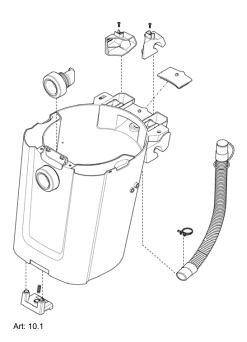

Art: 9.1

Art: 9.1 shows how the 35 L container is fitted with front and back wheels including the rear axel.

*Please note that the inlet will need to be damaged/cut in order to change it.

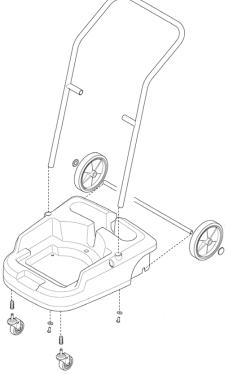

MAXXI II - Container 55-1, 55-2, 75-1, 75-2

Art: 10.1 shows how the drain hose, drain lit, and the release is fitted to the container.

*Please note that the Inlet will need to be damaged/cut in order to change it.

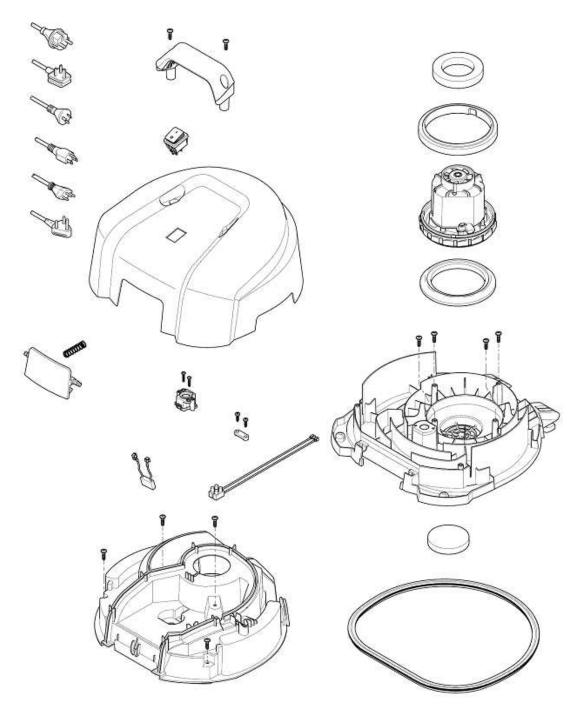

Art: 10.2

Art: 10.2 shows how the front- and rear wheels, axel, and the handle is fitted to the trolley.
