5000 Series *Automatic Scrubbers*

5000 Series Automatic Scrubbers

Superior Scrubbing Performance

The swing out split skirt system on Models 5500-5560 allow for quick and easy brush/pad changes.

The Speedlock™ feature on the 5100 makes changing brushes or pad drivers as easy as touching a button.

The 5100 is equipped with a convenient rear fill port that allows the operator to fill with a bucket or hose.

Tennant's automatic floor scrubber line offers a full range of walk-behind models, with variable scrub path widths, optional recycling systems and off-aisle cleaning, we're sure to have the right scrubber for your job. All of our scrubbers feature simple controls and easy-to-read gauges so that operators do a perfect job the first time. Built to last, our scrubbers are constructed of durable rotationally molded polyethylene to withstand daily wear and tear. Most importantly, Tennant scrubbers leave your hard floors clean and attractive, dry and safe.

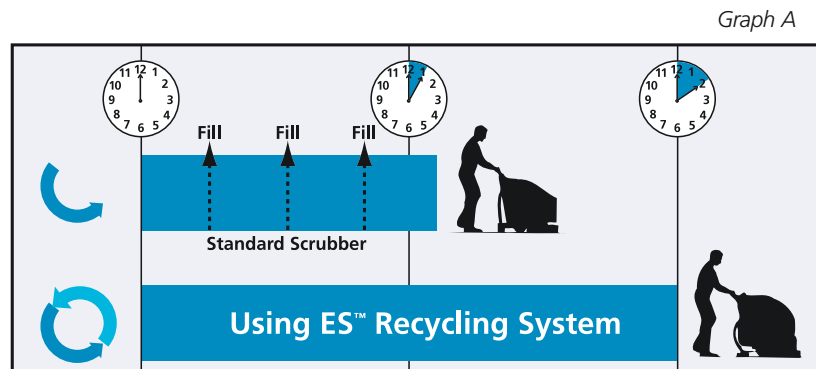

Every Tennant Scrubber is uniquely designed and carefully constructed to give you daily reliability and consistent results.

Simple operation and superior performance make Tennant scrubbers the right choice for cleaning professionals.

Optional Recycling System for Greater Productivity

All Tennant scrubbers offer an optional solution recycling system. Solution recycling is an optional accessory feature that extends scrub time up to 2.5 hours more without interruption (Graph A). This recycling system uses less solution, chemical and water while eliminating wasted time spent on emptying and refilling solution tanks.

Whether your facility has small, congested areas or wide open aisles, look to Tennant to meet all of your cleaning challenges.

ES™ Solution recycling maximizes scrubber productivity

The compact 43 cm 5100 scrubber is perfect for scrubbing or stripping floors in tight spaces. The 5100 employs the Speed Lock™ feature for easy brush or pad driver changes, adjustable height console, variable down pressure to 43 kg and is available in battery or cord electric models.

The 5200 scrubber offers power and performance in a compact package. The 5200 is compact enough to scrub in smaller areas yet large enough to productively clean larger hard floor surfaces. Features include a 51 cm cleaning path, front and rear solution fill ports, floating head design, flashing safety lights and variable down pressure.

Adjustable Console

Height adjustable control console fits all operator heights for comfortable operation.

Hinged Recovery Tank

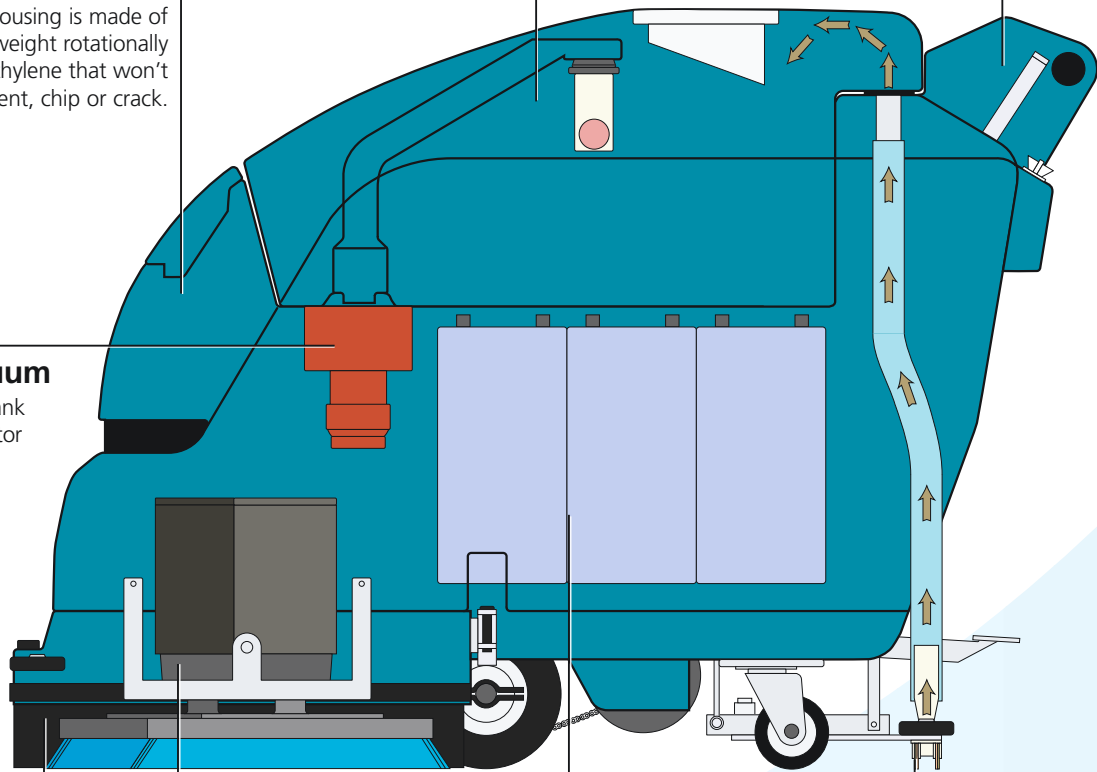

Large 102 L hinged recovery tank allows for long run time between stops and easy access to batteries.

Rugged Construction

Scrubber housing is made of durable and lightweight rotationally molded polyethylene that won't rust, corrode, dent, chip or crack.

Powerful Vacuum

The 550 W, 3 stage tank mounted vacuum motor provide excellent solution recovery.

Swing-Out Brush Skirt

The easy to open split brush skirt contains solution and provides quick access to pads or brushes.

Dual Down Pressure Settings

Scrub head down pressure can be set for 46 kg for daily cleaning and 70 kg for heavy scrubbing or stripping applications and provides consistent cleaning results.

Battery System

Economical 24 volt system provides several hours of continuous run time per charge.

Xtreme Recovery Squeegee System

The XR squeegee system provides excellent solution retrieval. The breakaway parabolic squeegee provides optimum performance and requires no tools to change.

The 5500/5520 scrubbers feature variable path widths from 61 cm to 66 cm and are the perfect size for maintaining medium to wide open areas. Features on these units include front and rear solution fill ports, swing-out brush skirt, floating head design, flashing safety lights and variable down pressure to 68 kg.

Scrub large areas productively with the 5540/5560 automatic scrubbers. These automatic models features wide scrub paths from 69 cm to 84 cm, safety lights and dual down pressure settings for daily scrubbing or stripping applications. The large solution and recovery tanks and economic battery system allows for long run time between charges.
