### SQUEEGEES

- Tennant squeegee blades are offered in three different materials with heavy durometers to meet demanding performance needs. Most blades offer four usable edges for long life and low cost-in-use.
- Linatex is our standard blade offered on scrubbers. This material performs well in most industrial applications.
- Urethane is available as an option. This type of blade is excellent on oily or rough surfaces.
- The optional gum rubber squeegee is best for water pick-up on smooth and tiled floors, and is not recommended for oily or rough floors.
