Advolution™ 20B/20BT/24B/24BT

Battery Burnishers

FACT SHEET

Superior Shine in a Sleek, New Design. All at an Affordable Price.

When the job calls for restoring your floor's gloss, the affordable Advance Advolution™ battery burnisher outshines even its contemporary new look.

The Advolution walk-behind battery burnisher delivers consistent and even polishing with self-regulating pad pressure and a floating, flexible pad driver. This eliminates the need for operators to make adjustments to the pad pressure. The Advolution is available with a 20 or 24 inch burnishing path with either pad assist or traction drive.

Choose from either wet batteries for dependable long run time, or maintenance-free AGM gel type batteries for an even longer run time. The onboard battery charger allows for convenient charging at any 120 volt outlet so that operators don't have to return the machine to a storage area.

Safety isn't sacrificed for price and performance, either. An angle-activated safety switch keeps the machine from starting when tipped back in the pad change position. Superior mobility and line of sight mean the Advolution battery burnisher is just as safe when running.

The Advolution battery burnisher is easier to use than any other burnisher in the market – just turn it on and go. The burnishing deck automatically lowers to the floor when the burnisher motor turns on, and returns to a raised position when the motor is turned off. Simple controls minimize training time and expense.

All models feature the best passive dust control in the market, which helps improve indoor air quality. A felt seal contains all dust within a specially designed shroud, directing it into a dual-port, disposable filter bag. For facilities where indoor air quality is even more critical, optional active dust control is available with the addition of an Adgility™ hip-style vacuum on the front of the machine.

Whichever model you choose, the Advance Advolution battery burnisher gives you high performance, cleaner indoor air quality, and competitively priced equipment demanded in today's market – all in a new, modern design.

TYPICAL APPLICATIONS INCLUDE

- K-12 Schools
- Colleges and Universities
- Hospitals and Healthcare Facilities
- Supermarkets
- Retail Stores and Shopping Centers
- Government Buildings

STANDARD FEATURES INCLUDE

- Passive dust control
- Self regulating pad pressure
- Quiet at 65 or 68 dB A
- Simple to operate controls
- Onboard charger

OPTIONAL ACCESSORIES INCLUDE

- Passive vacuum paper bags
- Active vacuum paper bags
- Active vacuum cloth bag
- Aqua HS burnishing pads
- Natural blend tan HS burnishing pads
- Natural blend white HS burnishing pads

Advance Advolution™ 20B/20BT/24B/24BT

Battery Burnishers

Two port dust bag is easy to access for bag changes

Optional active dust control vacuum available

Easy to operate control panel and palm switches

Pad changes are easier with the tip back design of the Advolution™

Defining Cleaning Innovation...

- Our products are designed using innovative technology that increases productivity and drives down the cost to clean.
- You can get expert service and maintenance for your Advance machines from factorytrained personnel around the world. Fast parts delivery, too.
- Maintain peak performance with Nilfisk Genuine OEM Parts.

Nilfisk Genuine OEM Parts
